SUPPORTING LEARNING AT HOME

To help reinforce the learning happening in class, we've set up a new Google Classroom called **Rimu - Activities for Home**. This space includes activities that align with what we're covering in class and are a great way to support your child's understanding and retention of key learning.

If you'd like to explore these activities with your child at home, you can join the classroom using this code: **tvpxaknt**.

♥ Your child already knows how to access Google Classroom, so they'll be able to show you how to log in!

Thank you for your continued support with your child's learning journey.

WELCOME BACK RIMU WHĀNAU!

We hope you all had a restful and enjoyable break. It's been lovely to welcome our Rimu students back for another exciting term of learning, discovery, and creativity. The energy in the classrooms has been fantastic, and we're already diving into some engaging and hands-on learning experiences.

WHAT'S COMING UP?

This term, our science focus kicks off with an exploration into the world of forensic science. Students will become young investigators, solving mysteries and learning how evidence is collected and analysed. As the term progresses, we'll shift our attention toward the more formal aspects of the scientific process-making observations, forming hypotheses, and conducting experiments. A definite highlight will be our visit to the Science Roadshow, where students will be able to interact with a range of scientific displays and demonstrations.

In mathematics, we'll be weaving in measurement concepts alongside our continued work with number knowledge and strategies. Our measurement learning will link well with our science investigations, making the learning meaningful and relevant.

Writing this term promises to be an exciting ride! We'll begin with narrative and descriptive writing, using imagined crime scenes to spark our creativity. As our science focus shifts, so too will our writing, evolving into more formal scientific reports and explanations.

We're looking forward to connecting with you all during Learning Conversations in Week 5-a great opportunity to discuss progress, celebrate successes, and look ahead to the rest of the year. Ngā mihi nui for your continued support.

Team Rimu
2025
